

Become part of a dynamic team!
Actively shape the development of innovative production!

Our LiCuSpace GmbH is currently expanding from a start-up in the field of high-tech development into an established company.

We are at the forefront of advanced, laser-based measurement technologies for climate relevant applications. We use state-of-the-art methods to generate unique innovations for obtaining environmental and climate data. We want to make the best possible contribution to the understanding of climate change with the highest precision and unique scope in the acquisition of climate data.

Production Manager (m/f/d)

Develop yourself dynamically!

We are active in international sales with a focus on results and are now building up the capacity of all our business units to supply and support our customers worldwide.

You can now develop quickly in our company - according to your skills, your enthusiasm and your development ideas - whether in a professional perspective, as a manager or directly in management! Our whole team will support you!

This is our offer to you! Lean processes instead of a large corporate structure with the same job security.

Full-time

Unlimited

As of now

Your main tasks

- Responsibility for production and the operational implementation of production
- Monitoring of production steps to ensure high quality and efficiency
- Introduction and development of lean management (CIP, 5S, TPM, ...), implementation and improvement of lean and quality management methods
- Sustainable organization and control of production in day-to-day work (e.g. by setting up and maintaining KPIs)
- Disciplinary and technical management of all production employees
- Long-term establishment and development of the team at the location and the individual employees
- Checking and maintaining the machines and production facilities used
- Medium-term: employee deployment planning as well as training and instruction in production processes
- Budget responsibility and great creative freedom with regard to the further development of production processes
- Ensuring compliance with prescribed occupational safety regulations
- Close cooperation with the entire management and production team to ensure that production deadlines are met
- Participation and creative freedom in planned projects for digitization and equipment procurement

We offer

- A varied, independent and challenging task
- Unique opportunity to help shape the development of a high-tech manufacturing environment
- A high degree of individual design freedom with room for creative ideas
- Further training and qualification for the above-mentioned area of responsibility
- Flexible working hours and home office
- An innovative corporate culture with flat hierarchies and short communication channels
- Personal development freedom and the chance to grow with us

Your profile

- Training in a relevant technical field (e.g. master craftsman, technician or degree in production technology, mechanical engineering or similar)
- Ideally a few years of professional experience in manufacturing or production
- Experience in plant management and production process management
- Knowledge of quality management, process optimization and safety standards
- Organizational talent, assertiveness and problem-solving skills
- Experience with additive manufacturing processes (plastics, metals) is desirable
- High resilience, ability to work in a team and flexibility
- Reliability, commitment and ability to organize yourself
- Confident written and spoken German and English skills

What is our employee vision?

We believe in the attractiveness of the Baltic Sea in combination with sophisticated high-tech products!

Our employees are highly qualified and some have already explored the big wide world. They have children or are planning to have children and are wondering where would be a good place to settle down.

The beautiful Baltic Sea region with its immediate proximity to the water and all the water sports options from SUP to deep-sea sailing, coupled with the picturesque back country where you can really enjoy nature on foot or on horseback, provide the perfect setting.

Affordable housing, a completely good infrastructure in Wismar and the surrounding area, affordable properties for your own four walls, very good medical care, excellent new shopping facilities, new daycare centers, new schools, good public transport connections and, last but not least, good and well-paid jobs are the basis on which to build a good life.

If this sounds like you, then become part of an ambitious, young team and an exciting start-up vision!
